

RECOVER*US*

The path to recovery begins here.

A COMPLETE GUIDE TO
DETOX & RECOVERY

BREAKING THE PATTERN OF ADDICTION

If you or a loved one is experiencing issues with addiction of any kind, we're here to help. Our focus on recovery and restoration is for anyone experiencing addiction and the devastation personally, physically, and emotionally that comes with it. You can be your ideal self. Our trademarked system of addiction recovery is both medically supervised and evidence-based, using the specific brain restoration protocol of Release/Recover/Restore™. All of our programs are custom tailored to your needs and we don't stop there. We continue to offer support for you and your family with ongoing care to help you prevent relapse and get your life back.

THE EXPERTISE TO HELP

At RecoverUS, our Founders and Medical Staff bring over 75 combined years of patient practice and experience to this facility. We know how to help our patients not only recover from their unhealthy brain patterns but how to physically, nutritionally, and mentally restore their lives. Helping you break your personal pattern of addiction is truly our passion.

WE UNDERSTAND ADDICTION & RELAPSE

That's why we focus on the end game, a drug free life. While it may be hard to imagine, it is possible. Recovery is about re-building your life starting from the ground up. All of the pieces are there for full recovery, yes, a return to a normal brain pattern and a normal life. You simply need a workable plan that's proven and doable. We have a customized plan to change your pattern and restore your life. Hope, answers, guidance and long term recovery begin with us, RecoverUS. You never meant to become addicted. You just wanted to feel better. You probably didn't even realize that it was happening, but it did. And now you're hooked.

HOOKED DOESN'T MEAN HOPELESS

Maybe you've tried to get clean on your own but it didn't work. Or perhaps you tried a recovery program that worked for a while, but it didn't really stop the cravings, it was too complicated or maybe

it simply replaced your addiction with another one. Where's the fix in that? Whether your addiction is opioids, alcohol, prescription medication or even recreational drugs, you'll immediately find that RecoverUS is different...and IT WORKS - in often as little as ten days, helping you get back to your normal life quickly. Unlike other detox programs, our system does not rely on other narcotics (Suboxone® or Methadone) to help you break your addiction. After all, what's the point if you are simply trading one addiction for another?

EVERY ADDICTION IS UNIQUE

At RecoverUS, we treat you individually, fine-tuning our Rapid detox program and treatment especially for you to ensure your success. Your specific treatment plan is completely outlined and explained to you and the others in your life, all under the supervision of highly-trained and respected physicians, addiction counselors, and medical staff

RELEASE/RECOVER/RESTORE™

What really separates us from other detox programs is our attention to details and our trademarked Release/Recover/Restore™ approach. We will absolutely not replace what you are addicted to with some other narcotic that you're equally dependent on.

WE USE THE BRIDGE®

We recommend the Bridge, an FDA approved medical device, which helps curb the effects of Opiate and Alcohol withdrawal within minutes of application.

NAD+ IV THERAPY & RECOVERY

At RecoverUS, we offer a unique, trademarked approach which is different than typical Detox and recovery centers. We use many formulations of NAD+ and exact ratios of Amino Acids to help with your symptoms of withdrawal during detox and on

to brain recovery.

The entire NAD+ process is safe and 100% natural. This specialized IV therapy helps

to diminish the effects of substance abuse and helps to restore proper brain pattern. You want to be better now, so we've designed a medically-proven, evidence based, detox program that typically takes only ten to fourteen days to complete.

IT'S TIME TO GET YOUR LIFE BACK

Don't wait any longer to change your brain's addiction. We can help and we're just a phone call away. Call us right now to start a new pattern, a new approach and a whole new you.

DID YOU KNOW?

People feel pleasure when basic needs such as hunger, thirst and sex are satisfied. In most cases, these feelings of pleasure are caused by the release of certain chemicals in the brain. Most addictive substances cause the brain to release high levels of these same chemicals that are associated with pleasure or reward.

TREATING THE
WHOLE PERSON
ON THEIR ROAD TO
RECOVERY

LONG TERM BRAIN RESTORATION

Detoxing was just the first step toward a life free from drug addiction. The process to restore your brain and your life takes time. Research shows full brain recovery from addictive drugs takes at least a year and possibly longer. Brain cells are slow to recover, but they will recover and rebuild with a new pattern and a new picture of your life. It simply takes time to heal fully. That's why we walk with you for life-long freedom. At RecoverUS, we know that aftercare support is important and every client receives a personalized treatment plan for long term recovery. And, we partner with recovery professionals across the nation to help you each day.

NALTREXONE®

Naltrexone® is a non-opioid, non-addictive medication that blocks the cravings and the effects of Opioids and Alcohol. Administered by injection or pellet form, this safe and effective approach had been available for many years, yet never before combined with specific treatments we have developed. After your Rapid detox is complete, we test to ensure all drugs and alcohols are out of your system and then offer Naltrexone®.

Once Naltrexone®, commonly referred to as Vivatrol is in your system, you will not be able to experience the effects of Opioids or Alcohol. This therapy can be utilized for an extended period of time as you develop new brain pathways with our Brain Recovery approach. Naltrexone® is very effective in stopping the cravings associated with addiction without using replacement drugs like Suboxone®. Our goal is for you to regain a healthy and complete life without the desire or cravings for drugs.

NUTRITIONAL THERAPY

Addiction to drugs and alcohol devastate the brain and body in many ways. Mineral depletion, gut flora devastation and stamina are just a few of the implications. When you lose any of these vital components to a healthy life, your body will ultimately pay the price. Our approach is to replenish the mineral content available to your system by enhancing the gut biome which in turn will boost your immunity and overall health.

Enzymes, minerals and Trace Minerals are keys to accomplishing this restorative process. And, this path leads to a healthy brain, a recovered brain

B.E.S.T

(BIO-ENERGETIC SYNCHRONIZATION TECHNIQUE)

B.E.S.T is a gentle healing system used to address stress and promote balance in the body including the nervous, muscular, circulatory, digestive, and hormonal systems. When a system moves out of balance it creates a pattern of physical, emotional, and chemical symptoms including illness and disease. B.E.S.T. has been used by thousands of physicians and health practitioners around the world for 45 years. This technology is a system designed to help reduce specific recurring brain patterns which cause physical and emotional challenges in your body, including addiction. The procedure is easy to administer and profound in its ability to help surface the stressful patterns you may be experiencing.

B.E.S.T & ADDICTION

It's no secret; brain patterns of addiction are deep-set. Both the environment and individual genetic makeup play equal parts in determining our addictive behaviors. And, how these patterns affect our daily life is most often frustrating and even debilitating. Even before the Rapid Detox process begins, we begin balancing your brain/body patterns which helps you get through the initial Detox as quickly as possible. The goal at RecoverUS is to restore your normal brain patterns to their fullest potential possible. We use specific protocols when dealing with each type of addiction to ensure we are able to help eliminate your addictive behavior patterns. Being able to uncover your specific brain patterns associated with your specific addiction, allows us to balance your brain to a new picture of health and recovery.

ONGOING SUPPLEMENTATION

is recommended for continued brain restoration and to combat the effects on your overall body due to abuse from drugs and alcohol.

WHAT ADDICTIONS DO YOU TREAT?

We address addiction to alcohol, recreational and prescription drugs, and tobacco.

WHAT IS NAD+ ?

Nicotinamide Adenine Dinucleotide (NAD) is a molecule which is present in all cells of the body, and energizes brain restoration. It is a naturally occurring co-enzyme found in every living cell. NAD+ is an effective detox treatment for alcohol, opiates, prescription drugs, recreational drugs, and it has been shown to reduce cravings and help with overall brain recovery and restoration.

IS TREATMENT SAFE?

Yes. Our treatment and protocols are time tested and completely safe. Our medical staff works under the supervision of a licensed medical physician. Each case is evaluated and approved by the medical team who develop a customized treatment plan for you.

WHAT IS BRAIN SYNCHRONIZATION & B.E.S.T.?

This technology (B.E.S.T.) is a system designed to help reduce specific brain patterns which cause physical and emotional challenges in your body, including addiction. B.E.S.T. has been used by thousands of physicians and health practitioners around the world for 45 years. Being able to uncover your specific brain patterns associated with your specific addiction, allows us to balance your brain to a new picture of health and recovery.

HOW LONG IS TREATMENT & WHAT'S A TYPICAL DAY LIKE?

Treatment runs 10-14 days depending on your individual addiction. Each day of treatment starts in the morning and is finished by early afternoon. You will then return home or to local lodging. The first day is a bit longer, up to 8 hours for the treatment and subsequent days are shorter, lasting 4-6 hours.

TELL ME MORE

Each day, (as indicated by your treatment plan) you may receive NAD+ therapy, comfort medications, hydration and complementary ancillary treatments to calm and refresh your brain/body balance. We will speak with you about nutrition, stress reduction, counseling and how to avoid your personal "triggers" which can cause a setback in your treatment.

WHAT IS THE SUCCESS RATE?

After treatment with NAD+ protocols, clinics report 9 out of 10 patients experience little or no cravings, better mental clarity, increased energy and improved mood.

WHAT IS NALTREXONE®?

Naltrexone® (Vivattrol) is a non-addictive, non-narcotic medicine that prevents cravings and reduces the odds of a relapse. Administered in either a pellet form or injection, this medication can be a life saver for those with opioid and alcohol addiction and long term recovery.

WHAT IS THE BRIDGE?

For some patients, we recommend the Bridge, an FDA approved medical device, which helps curb the effects of Opiate and Alcohol withdrawal within minutes of application. The Bridge is a gentle neuro-stimulation system (NSS) device that attaches just behind your earlobe that works nearly 100 percent of the time by gently stimulating the nerves to your brain to create a feeling of calm and ease and all within 10 minutes or less.

WHAT IS THE COST & DO YOU ACCEPT HEALTH INSURANCE?

There is no charge for you to call our office at any time. Our fees range from \$8,500-\$25,000 depending on the prescribed plan for you. The cost will be directly dependent on the type of addiction and length of time necessary to detox. Generally treatment is 10-14 days. We are primarily a private-pay medical service. Payment is expected at time of service by cash or credit card. Personal checks must clear prior to initiation of treatment. We will supply, upon request, information regarding your services so that you may file your personal insurance.

Imagine your life without the effects of drug and alcohol addiction. Maybe it was so long ago you can't remember at all. Your life has been taken over by your addiction and its affects. You suffer, your family suffers and your life suffers. At Recover US, we help you take back your life. We help you "change your story" to a clean life free from addiction. Taking back your life helps repair your damaged body and your damaged relationships. It's the path to the life you deserve to enjoy to its fullest. The steps to long term sobriety are Release/Recover/Restore™....for life.

If this is your life right now, we can help as soon as you call us. If this is about someone you love and they need help, please give us a call at **(618) 519-9444**.
